

Do you know what your child is watching online?

Dear parents and carers

Does your child access YouTube? Do you know what they are watching? It has become apparent that children are not always watching age appropriate content.

RESTRICTED MODE

This setting can be enabled on both the YouTube app and website. This clever feature limits what your child has access to, e.g. potentially mature or objectionable content.

Make sure that you have a conversation about what your child is watching online. Ask them who their favourite YouTubers are.
